

MOVE-MOD[™] Series Modular Circular Connectors Catalog

We Connect When it matters most

Across multiple end markets Veam connectors make it possible to transfer power, signal and data in an increasingly interconnected world.

Proven quality, reliability and expertise

The Veam difference

- Global capabilities & local support
- Proven application expertise
- Over 60 years of interconnect leadership
- A committed innovator & business partner

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in Stamford, Connecticut, with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information, visit www.itt.com

MOVE-MOD[™] Series

veam

True modularity in a circular interconnect. Delivering power, signal and data in a single connector.

The innovative new MOVE-MOD[™] series delivers the ultimate in modularity and flexibility by utilizing a range of snap-in modules to enable a variety of contact layouts in the same connector. Whatever the application, you can configure and reconfigure a tailor-made solution that can deliver power, signal, and data in a single ultra-robust connector shell.

Toolless assembly and installation make MOVE-MOD extremely quick and straightforward to work with, and the minimized component requirement delivers cost and time efficiencies throughout the supply chain. A unique ultra-secure bayonet coupling mechanism with secondary locking and a circular form factor that minimizes weight and footprint size means you can rely on MOVE-MOD to deliver — when it matters most.

Technical Overview

Environmental Sealing	IP67
Operating Temperature Range	-55°C to 115°C
Hazardous Substance Compliance	RoHS and REACH
Corrosion Resistance	Minimum 500hrs salt spray resistance
Fire and Smoke Standards	EN45545 R22/R23 HL3 NPFA 130 UL94V0
Railway Standards	EN 50467 (full details available on request)
Shock and Vibration Standards	EN 61373 Category 2 (up to bogie application)
Mating Cycles	Minimum 500
Electrical Standards	EN 50124-1 (OV3-PD3)

Key Features

- Power, signal and data in a single connector
- Minimized component requirement delivers time and cost efficiency
- Quick and simple toolless assembly and installation
- Unique ultra-secure bayonet coupling mechanism with secondary locking
- Minimized weight and a space-saving footprint
- RoHS compliant ruggedized plating options including Blue Generation (T240) and Black Hard Anodized (T89)

Applications

- Railway rolling stock and infrastructure
- Heavy and off-road vehicles
- Harsh environment industrial
- Automation and robotics
- Autonomous and electric vehicles
- Energy and power distribution
- Machinery

Circular Size Advantages

One key advantage circular harsh environment connectors have over their rectangular equivalents is the footprint. As illustrated below, a high-density circular solution such as MOVE-MOD can deliver similar a contact count to a rectangular connector but with a footprint that is considerably less. Vital, for when space is at a premium, or you need flexibility for future application developments.

Comparible receptacle connectors with similar modules, poles and electrical characteristics

Unique Ultra-secure mating with Secondary Locking

With an innovative bayonet coupling systems that utilizes a reduced rotation angle, a smooth ramp, a sliding coupling nut and pre alignment studs, MOVE-MOD is both resistant to the harshest shock and vibration conditions and simple to couple and decouple. It features a patented secondary locking system with visual, tactile and audible locking confirmation.

Innovative and Fully Proven Plating Options

MOVE-MOD is available in two ultra-harsh environment RoHS and REACH compliant plating options that deliver 500 hour salt spray resistance. The proprietary Blue Generation (T240) plating is high-performance Zinc Nickel formulation that is conductive and offers excellent RFI shielding. While the non-conductive Black Hard Anodized (T89) solution is deployed in extreme environments throughout the globe.

40A Contact (10mm²) Crimping Die

Contact Insertion Instructions

With Grommets (single wire sealing required)

3. Some grommets have holes closed with a membrane which should be pre-punched in order to help the female contact insertion. For this operation a pin can be used. The membrane avoids using filler plugs if the cavity is not used.

5. Continue for all other contacts. Start with contacts at the center and work your way out.

2. Simply push grommet in the rear location of corresponding module. Be careful to select the correct cavity numbers present on its faces.

4. Push the contact (*) through the grommet hole according the wiring diagram, until the mechanical stop is reached. Gently push and pull the individual wire a couple of times. The motion will show if the contact is correctly seated.

(*) M12 contacts must be installed before the grommet.

Use the Correct extraction tool to remove contacts

Contact Insertion Instructions

Without Grommets

1. Push the contact through the cavity according the wiring diagram until the mechanical stop is reached. Gently push and pull the individual wire a couple of times. The motion will show if the contact is correctly seated.

Use the correct extraction tool to remove contacts

Highly engineered connector solutions for multiple end markets.

Why ITT

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. Veam connector products are relied on by global customers in multiple end markets. ITT's Connector business, which also includes the Cannon and BIW Connector Systems brand, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
