

# A Value-Added Distributor

As a value-add distributor, we assemble connector products, in both catalog-off-the-shelf and custom configurations, to meet your specific application requirements.

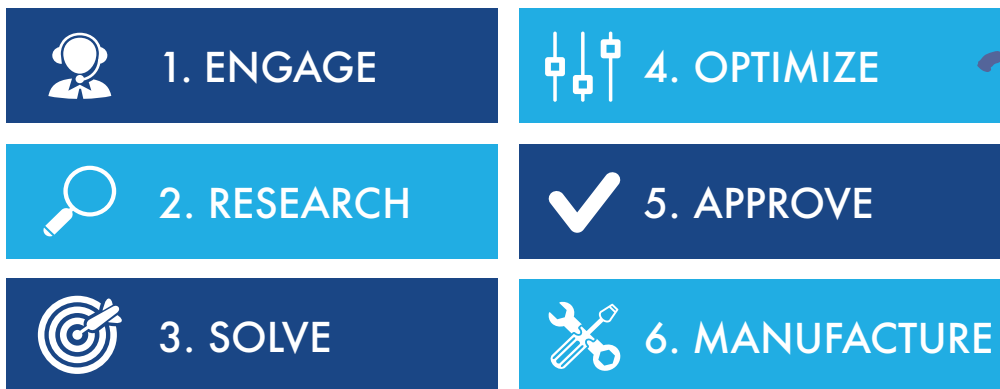

## WHAT IS VALUE-ADD ASSEMBLY?

PEI-Genesis is different than typical connector distributors. Rather than buying pre-built connectors from our manufacturer partners and shipping them to our customers, we stock all the individual parts, including accessories, then build the connector to order using a mix of automation and manual processes.

## OUR QUALITY PROMISE:

PEI-Genesis prides itself on our product knowledge and quality promise. Our quality engineers are Six Sigma-certified, validating them in identifying risks, errors, or defects so that you can count on receiving high-quality products fast. We have a dedicated team of trusted advisors worldwide to solve your connector challenges. [Learn More](#) ➤

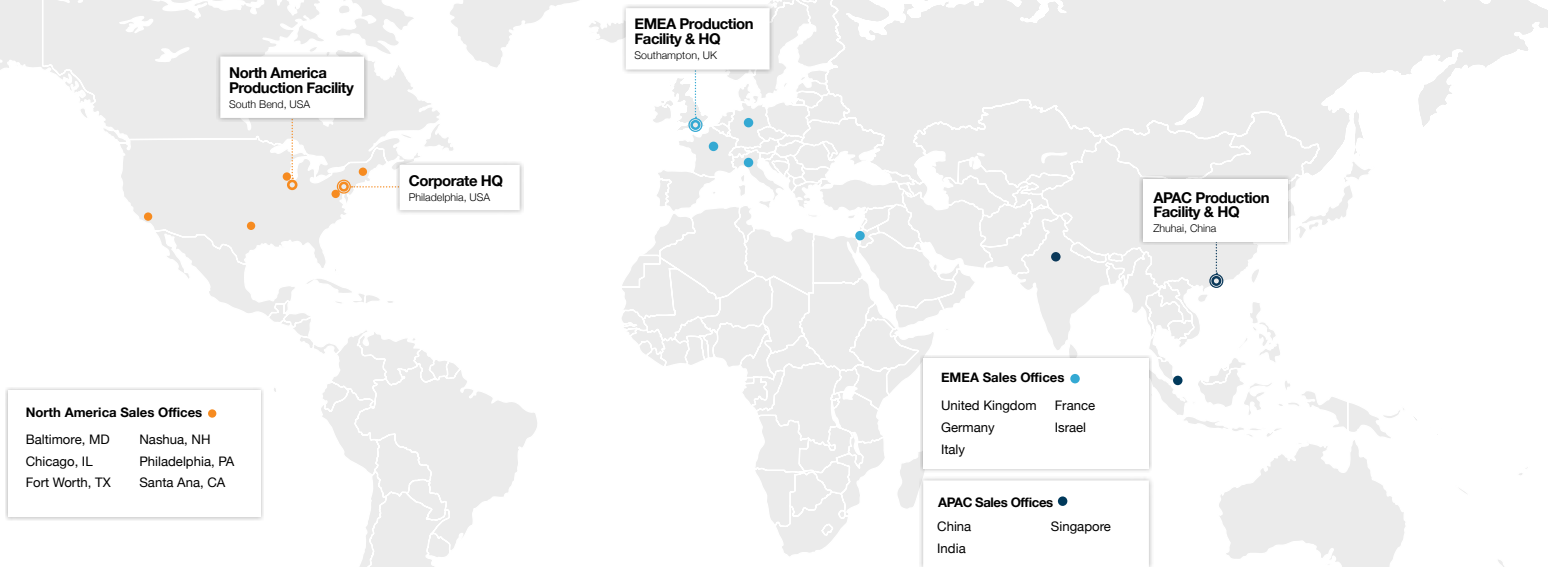

## OUR CUSTOMER ENGAGEMENT PROCESS:

*Our PEI engineers can design a layout or drawing of your prototype for approval to then test within your electronic system.*

# In-House Capabilities

Beyond Distribution: PEI-Genesis Offers Customization and Inventory Solutions for Your Next Application

## CUSTOMIZING CONNECTORS

- In-House outgassing
- Custom kitting and packaging
- Thousands of part number configurations
- Supply chain solutions
- 4 Production Facilities
- \$100 million in component inventory

## SUPPLY CHAIN SOLUTIONS

- Low to No MOQ
- Shorter lead times
- Lower costs
- Just-in-Time delivery
- Bonded Inventory
- MyPEI Account
